

Continuing Your Net Zero Journey

Cuckfield Parish Council

13th June 2024

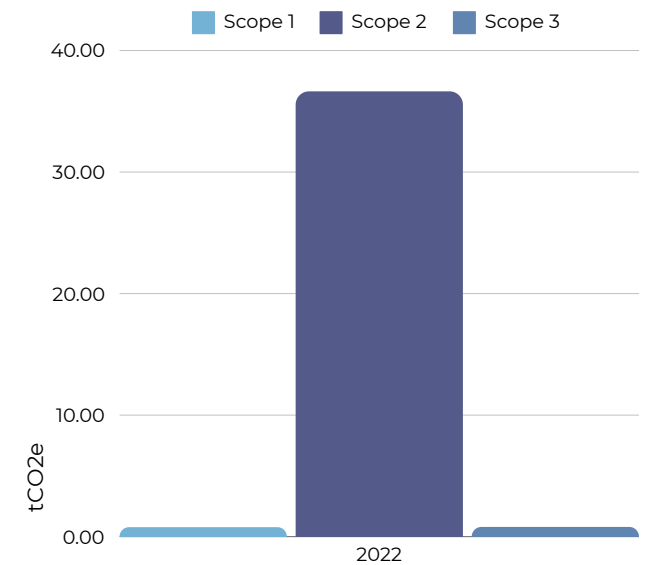

Your journey so far

Carbon footprint

Cuckfield Parish Council's total carbon footprint April 22-March 23, for Scopes 1, 2 and elements of Scope 3 was:
38.22 Tonnes CO₂e.

	Activity	Tonnes of CO ₂ e
Scope 1	Fuels	0.78
Scope 2	UK Electricity Heat & Steam	6.69 29.96
Scope 3	Waste Disposal Commuter Miles	0.35 0.45
Total		38.22

No other emission activities have been identified from Cuckfield Parish Council's operations in Scope 1, 2 or elements of Scope 3.

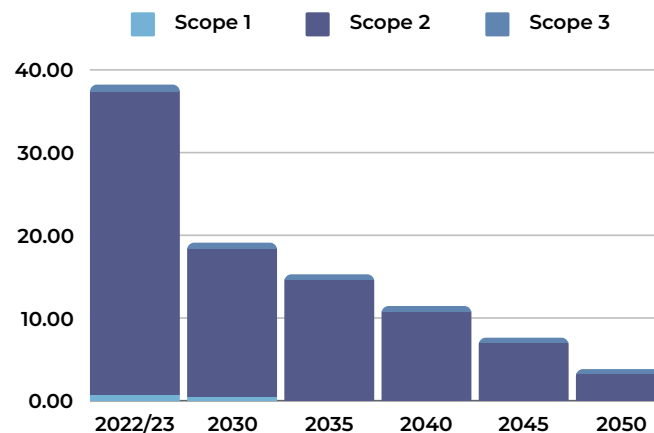

Your journey so far

Carbon Reduction

To be accountable for the progress in achieving Net Zero, Cuckfield Parish Council has adopted the following carbon reduction targets.

- ✓ **Net Zero by 2050 (90% or more reduction of baseline emissions)**
- ✓ **Carbon Neutral for Scopes 1&2 by 2040**
- ✓ **50% reduction by 2030**
- ✓ **35% reduction in 5 years (2027)**

Cuckfield Parish Council's projected reduction.

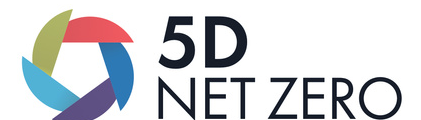

Progressing to Net Zero

With your baseline complete, we will look to expand your scope of reporting and embed sustainability in your operations.

This would include a renewed carbon emissions calculation and reduction plan. This will report your progress and a plan for the coming year's initiatives.

Additional support for easing reporting efforts, and looking at staff and stakeholder engagement is available, depending on your needs.

Carbon Calculation

Calculating your carbon footprint enables you to identify and quantify key sources of Greenhouse Gas (GHG) emissions, across all areas of your business.

We can calculate the carbon emissions produced by your business, measuring Scopes 1, 2 and 3 in accordance with the Greenhouse Gas Protocol Corporate Accounting and Reporting Standard to ensure accurate reporting.

Reduction planning

Once we have measured your carbon footprint, a PPN 06/21 Carbon Reduction Plan (CRP) is the best way to outline your targets and validate your commitment to achieving net zero.

Our comprehensive plans, set out tailored and actionable recommendations to reduce emissions to a minimum.

Your carbon reduction plan should be published externally to drive progress and communicate your net zero ambitions.

It is important to complete a reduction plan annually in order to review Net Zero targets and initiatives alongside your organisation's growth.

Implementation

Efficient reduction in your organisation's emissions can be challenging. The 5D Net Zero team can support in the following ways:

- Inform/Learn - Develop environment awareness and skill base
- Engage – Communicate your actions, the reasons, and the benefits.
- Connect – Develop collaborative partnerships and networks aligned to your goals
- Action – Make the work you are doing tangible, combining the above, through volunteer days, training and action days

Action - Events

Depending on your needs, we can provide a series of additional events to support the engagement and education of your team including:

- Tree/ hedgerow/ street planting
- Sustainable flower workshops
- Carbon Literacy training

We can also provide more bespoke programs where needed, such as:

- Sustainability Competitions
- Senior Management Team & Board development

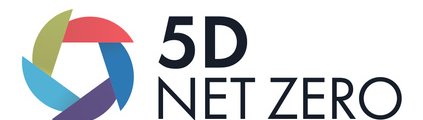

Carbon offsetting

Some organisations balance unavoidable emissions as part of their reduction plan.

We offer a portfolio of carbon offset projects best suited to your organisation's unique requirements and ethical goals.

Our carbon projects are compliant with the United Nations Sustainable Development Goals and Verified Carbon Standard or Gold Standard.

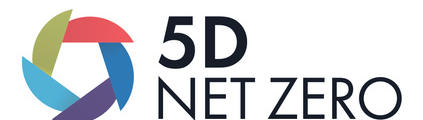

Certification

Our team of independent verifiers are compliant with the latest legislation and highest industry standards, allowing your business to report with confidence, take action and communicate your net zero ambitions with credibility.

No matter what stage you are at, from calculating your carbon footprint, setting a target, or offsetting your emissions, we can help.

Our partnerships

We work in partnership with the UK's most progressive businesses to reduce carbon, set targets and reverse climate change, in line with the UK government's target to reach Net Zero by 2050.
