Submitted to the MSDC Planning Portal

Reference: Outline Planning Application DM/20/0559

Following the decisions made by our respective Councils; individual submissions from each Council, objecting to the outline planning application, have been lodged with you via the Planning portal.

This letter is submitted to reiterate, not duplicate, the concerns detailed in our individual submissions.

Collectively we would regard it as a failure of our responsibilities and duties, if we did not stress to you, that the vast and overwhelming majority of our residents are totally opposed to the development due to the adverse impact it would have on the wider community, service provisions and the environment.

Like the rest of the nation most of our population have been preoccupied with the national emergency but have still found time to express how worried and concerned they are about this outline planning application.

Whilst our Councils have differing priorities in other matters we are totally united in our opposition to these proposals.
